Name: \_\_\_\_\_

Date: \_\_\_\_\_

## The Digestive System

esophagus	small intestine	rectum	gallbladder	stomach
anus	large intestine	mouth	pancreas	

Breaks food into small pieces with the help of the teeth and saliva.

Carries food from the mouth to the stomach.

Churns and mixes food with digestive juices that have acids and enzymes.

Produces enzymes that are released into the small intestine to help with digestion.

Stores the bile the liver produces, release bile into the duodenum to help digest fats in the food you eat.

Digests and absorbs proteins, fats, and carbohydrates.

Absorbs salt and water from food, leaving a soft mass called stool.

Acts as the stool's temporary storage.

Where stool exits the body.
